A Rabbit and Her Kittens

One day, Melanie, a nurse at an animal hospital, found six tiny kittens. Their mother was nowhere to be seen.

Melanie took the kittens home. She thought her pet cat would look after them. Instead, she got a big surprise. Her cat wasn't interested in the kittens. And the kittens weren't interested in the cat. It was Melanie's pet rabbit, Summer, that was the star.

"The kittens love their new rabbit mom. They don't leave her alone," says Melanie. "It's amazing. They climb all over her and look to get milk from her. Summer just sits there and lets them do it."

The kittens follow the rabbit everywhere. They don't like to be without her.

"They are all so cute together," says Melanie. "The kittens may start hopping soon!"

Dinosaurs

The word "dinosaur" comes from the Greek language and means "terrible lizard".

Dinosaurs lived on our planet a very long time ago. The oldest known dinosaur is Eoraptor, a meat-eater that lived 228 million years ago. People believe that dinosaurs lived on the Earth until around 66 million years ago.

Some dinosaurs ate meat and others ate plants. Most dinosaurs hatched from eggs, and they could not fly or live in water. Some dinosaurs walked on two legs, while others walked on all four legs. Some had horns and spikes, others had thick bumpy skin, and some even had feathers.

The biggest dinosaurs were over 30 metres long and about 20 metres tall. The largest dinosaur was the sauropod. The smallest dinosaurs were the size of a chicken.
